For RUSF contracts, On-site AMS Inspection: For new suppliers that have not produced successfully for USAID previously, an inspector from the USDA, Agricultural Marketing Service (AMS) shall be on-site during any or all periods of production, and will perform verification inspections in accordance with the CID and contract requirement. For current suppliers who have been producing either RUSF or RUTF for USAID, UNICEF, or WFP, which have successfully gone through a start-up process with USAID, it will not be necessary to have USDA/AMS inspectors on site. Suppliers will be required, however, to provide corresponding COAs and perform inspections in compliance with the CID and this solicitation. In addition, suppliers are required to submit samples for USDA/AMS testing for Salmonella and Enterobacteriaceae (EB) testing for microbiology monitoring and also samples for Vitamin A and Iron for continuous micronutrient monitoring. The government will conduct at least one audit (announced or unannounced) per year or as many times as necessary depending on supplier quality and food safety performance. For sampling purposes, the supplier shall collect 25 pouches for salmonella testing throughout the production lot, and representative of the lot. For EB, 10 pouch individual samples shall be taken throughout the production lot, and representative of the lot. For Vitamin A and Iron testing, the sample shall be a one pound composite comprised of enough individual pouches selected to be representative of the lot, to provide the necessary composite weight. For these four tests, a lot is defined as consisting of up to 5 continuous days of production. Samples must be labeled accordingly, including details such as lot number, run time and production line. Samples must be sent to the USAID laboratory in Gastonia, NC for analysis and results should be available for release of product within a timeframe that would not generate unnecessary delays in the procurement process. The USDA/AMS Gastonia laboratory will test the 10 EB samples individually and use pooling techniques for the testing of the

All contractors will be required to furnish an in-plant pre-award survey or have evidence of an AMS survey that has taken place within the last year. This survey must meet the Quality Assurance Provisions found in the RUSF CID Section 12. Quality Assurance Provisions 12.2.2.

Ready-to-Use Supplementary Food (RUSF) Commercial Item Description (CID) A-A-20362 can be found at:

[http://www.ams.usda.gov/sites/default/files/media/CID Ready-To-Use Supplementary Foods \(RUSF\).pdf](http://www.ams.usda.gov/sites/default/files/media/CID Ready-To-Use Supplementary Foods (RUSF).pdf)

The CID A-A-20362 has been amended for this solicitation and includes the following changes:

1. Paragraph 6.1.2 Energy content. The energy content of the RUSF shall be 500-550kcal per 100g. Proteins shall account for 13 to 20g per 100 g of product. Lipids shall account for 15 to 36 g per 100 g of product. Canola oil is preferred oil. Either partiallyhydrogenated (trans) fatty acids may be used, at < 3%, or a limited (< 3%) portion of saturated (dry) fat for the strict purpose of stabilization of the paste in a way that oil separation is reduced to a minimum at time of consumption.
2. Paragraph 6.1.3 Protein content. Vendors (not dairy ingredient manufacturers) must certify that the final product is melamine and aflatoxin M free and shall provide a Certificate of Analysis (CoA) to the purchaser.
3. Table I. Nutrient requirements per 100 grams Footnote 11: Total phosphorus should be calculated taking just 30% of phosphorus from plant sources to take the poor bio-availability of phosphorus into account.
4. Sodium Chloride should not be added to the premix or the product. It has been removed from the table but information on sodium content should be on the nutritional labeling.

5. Paragraph 6.4. Finished Product. Normally, because processing/packaging equipment need to be calibrated, workers may need additional training and there may have been changes in specifications, plants shall exhaust a start-up period before beginning full production. This period, determined in length and production volume by the vendor, is intended to fine-tune processing/packaging lines, workers, equipment, etc. running at minimum capacity, before producing massively. A start-up baseline set of data is necessary whether it is for microbiology sampling (to determine hot-spots, frequency, etc.) as indicated in Section 7.1 of RUSF CID, product attributes (average weight, consistency, etc.), packaging and personnel training; as indicated in Section 5 of RUSF CID. These data include CoAs for the testing required in section 7.1 of the CID. The plant should factor this into their production cost. Start-up run is not necessary when the supplier has produced the same product, in the same facility, within the previous three months, has microbiology and production baseline data should have been already developed. Technical representatives from USDA, USAID, WFP or any other stakeholder can opt to participate in the start-up phase in coordination with vendor. Start-up data will provide information on plant processing/equipment capability, which will make subsequent quality assurance monitoring easier, whether there is an AMS inspector onsite or not. Product resulting from start-up may or may not be for delivery under the contract, depending on the level of defects, quality assurance compliance, and presence of on-site AMS inspection personnel. Decision on product acceptability of start-up product will be made by the contracting officer, using inputs from USAID, USDA, and other sources.

6. Paragraph 6.4.1 Appearance and Texture: RUSF shall be of homogenous (no separation) texture with particle size which does not require and does not encourage chewing before being swallowed. This consistency and particle size should be determined at front, during start-up runs, by the vendor. Samples should be provided to the contracting officer or his/her representative for assessment and determination of organoleptic acceptability. Organoleptically acceptable product shall be used as a benchmark for future production which must be equal to, or better than, the samples considered acceptable by the contracting officer. Corresponding granulation data using recognized rheology methods such as Light Scattering should be provided. Sampling should be performed by vendor's employees and sent out to external ISO-certified lab. Proper ingredient (protein, carbohydrates, micronutrients, etc.) particle size should be required from suppliers. Generally, particle size under 200 microns would prevent separation and result in a smooth texture. Re-assessment of particle characterization should be done yearly. Vendor is encouraged to factor this initial texture analysis cost in finished product price. Texture and consistency of subsequent runs should then be monitored by sensory analysis, through daily organoleptic evaluations and comparison with the previously accepted benchmark product. Daily sampling for grading table should be performed three times per shift (beginning, middle and end). Texture data should be plotted and be available to the Government.

7. Paragraph 7.1 Proximate and microbiological testing requirements.

- a. For *C. sakazakii* control, Monitoring shall be done through Enterobacteriaceae testing of finished product. The tolerance is: < 10 cfu/10g (determined by testing 10 individual samples per lot with a limit of 2 samples not meeting < 10cfu/g). If out of specification samples exceed the limit, specific pathogen testing for *C. sakazakii* is required.
- b. Testing methodology for *C. sakazakii* should comply with Codex Standard (CAC/RCP 66 - 2008) for infant food (Negative in 25g as determined by testing 25 individual samples per lot).
- c. Vendor should have as part of its quality assurance program a well-defined corrective action plan if/when positive pathogen testing is obtained.
- d. Salmonella testing shall be performed on finished product. 25 pouches of finished product representative of the lot shall be sampled and individually tested for Salmonella. Results are required to be negative in 25g (determined by testing 25 individual samples per lot).

e. For the purpose of sampling size, a lot shall not be greater than 110 metric tons per day or a week of production, if daily production is < 110MT, or as determined in the Food Safety and Quality Protocol defined by the vendor for traceability and labeling.

f. Proximate and microbiological testing requirement: Clostridium tolerance should be corrected: Clostridium (sulfite reducing anaerobes Less than 100 CFU/g)

Peas, Yellow Split - 680 MT
 Milled Rice - 70
 Sorghum - 180 MT

SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS SET ASIDE:

Peas, Yellow Split - 410 MT

NOTICE OF SMALL BUSINESS SET ASIDE:

If specified in the solicitation, certain quantities are set aside exclusively for small business firms under the Small Business Act (15 U.S.C. 631, et seq.). Farmer-owned cooperatives, qualified as large under applicable SBA rules, are also eligible for award of set-aside quantities as provided in 7 U.S.C. 2209f.

If a large farmer-owned cooperative is awarded quantities under a small business set-aside, it shall perform the contract or cause the contract to be performed in accordance with the obligations of a business concern eligible for the small business set-aside.

Bids received for these set-aside quantities from firms who are not small business concerns will not be considered. In the event the Government is unsuccessful in contracting with an eligible small business concern(s) for the set-aside quantities, it may award the quantities to other than small business concerns.

Small businesses that wish to bid on both the set-aside and the non-set-aside quantities shall submit separate bids for each quantity using separate entity codes or shall limit their minimum quantity to the set-aside quantity. Failure to comply with this requirement may cause the entire bid to be considered non-responsive.

NOTICE OF 8(a) ACQUISITION:

If specified in the solicitation, the Government may reserve a portion of the requirements for 8(a) firms certified by the Small Business Administration in accordance with the Federal Acquisition Regulation (FAR), Part 19. Farmer-owned cooperatives are also eligible for award of set-aside quantities as provided in 7 U.S.C. 2209f. The Government may increase the reserve to adjust quantities to carlot increments in the event of multiple awards to eligible 8(a) firms. The Government shall offer for award to each 8(a) firm the lesser of: 1) their quantity bid of each targeted commodity, or 2) their proportional share of each targeted commodity, if the total quantities bid by all eligible 8(a) firms exceeds the amount of each targeted commodity. In no event shall the Government offer for award an amount in excess of an eligible 8(a) firm's maximum quantity, if so established by the Government. If the 8(a) smallbusiness firm is a nonmanufacturer, it shall meet the definition and requirements outlined in FAR Part 1. In the event the Government is unsuccessful in contracting with an eligible 8(a) firm for the reserve quantity, it may award the quantities to other than 8(a) firms.

Shipping period for plants located at the port:

December 23 to January 13, 2016

For plants located as f.a.s. vessel delivery locations:

The shipping period(s) for plants located at port shall apply only to contracts that are processed and/or bagged within the same port to which delivery will be made. If the port has multiple berths and/or terminals, the vendor shall be liable for delivering the commodity to whichever berths and/or terminals have been designated by the steamship line within that port. If the commodity is processed and/or bagged at one port for delivery to a different port, the shipping period(s) for inland plants shall apply. The Government shall issue shipping instructions (WBSCM "Purchase Orders") (PO) at least seven (7) calendar days prior to the first day of each period of performance scheduled in the contract. (See MSCP Part 3, Section A.8.) If shipping instructions are issued less than seven (7) calendar days prior to the first day of the contracted period of performance, the performance period shall be extended by the number of days the PO is issued late. The Contractor shall not be entitled to any extension of the performance period unless it furnishes evidence satisfactory to the Government that it was prepared to perform during the contracted period of performance.

10. Other Requirements:

When empty packaging is required:

The contractor shall ship the empty bags/boxes in the conveyance with the commodity. The contractor shall ensure that the empty bags/boxes are bundled securely and loaded into the conveyance so as to minimize damage and/or shortage to the packaging. There shall be no empty packaging shipped loosely on the floor of the conveyance. The contractor shall include the piece count of the empty bags/boxes on the bill of lading. The contractor shall include the piece count of the empty bags/boxes in the comments field when creating the Advance Shipment Notification (ASN) for the commodity within WBSCM.

Commodity requirements are available at:

<http://www.fsa.usda.gov/programs-and-services/commodity-operations/procurement-and-sales/export/commodity-requirements/index>

For commodity requirement KCBG10:

The contractor shall arrange for each lot of grain covered by an official domestic weight and grade certificate to be identity preserved when placed f.a.s.

11. Contract Closeout and Contractor Past Performance Evaluation:

Past Performance Evaluation.

The Government will prepare a past performance evaluation at the time the work under this contract is completed. Evaluation will rate performance areas such as quality of product or service, cost control, timeliness of performance, business relations, and when applicable, performance against, and efforts to achieve the goals identified in the small business subcontracting plan. Contractors will have an opportunity to comment on the Government evaluation. The past performance evaluation may be used by the Government to support a future award decision. Details on access and the use of contractor performance assessment reporting system will be provided at a future date.

12. FAR and Agriculture Acquisition Regulation (AGAR) Provisions and Clauses:

- A. This solicitation shall be subject to the terms and conditions of KCCO's Master Solicitation for Commodity Procurements (MSCP) in effect as of the date of this solicitation and can be found at:

http://www.fsa.usda.gov/Assets/USDA-FSA-Public/usdfiles/Comm-Operations/pdf/master_solicitation.pdf

The FAR and AGAR provisions and clauses applicable to this solicitation are contained in the MSCP.

- B. // Applicable if checked. FAR Clause 52.232-18, Availability of Funds (Apr 1984). Funds are not presently available for this contract. The Government's obligation under this contract is contingent upon the availability of appropriated funds from which payment for contract purposes can be made. No legal liability on the part of the Government for any payment may arise until funds are made available to the contracting officer for this contract and until the contractor receives notice of such availability, to be confirmed in writing by the contracting officer.

13. Unique Commodity Specifications Required for this Solicitation:

For Commodity Requirements Documents CM, CSB, CSBP, CSM, SFCM, SFSG, WSB, and WSM using multiwall paper bags or high performance multiwall paper bags only--commodity contractors may either use preprinted bags or utilize an online ink-jet printer to print the contract number, manufacturer's lot code, month of manufacture (if required), and best-used-by date (if required). If ink-jet printing is used, the information shall be no smaller than one-half inch, printed near the top of either one or both sides of the bag, and shall not overlap any other bag markings. The ink-jet ink shall be Universe black (75) oblique.

For Commodity Requirements Document SFCM4, Part 1, Section 1.1B, Vitamin A requirements in the finished product (i.e. including intrinsic and premix conditions) are deleted and replaced with:

A. This contract provides for Government quality assurance at source. The Government shall weigh, sample, inspect, and test the product offered in performance of the contract. The Government shall pay for the sampling and testing.

1. Sampling and testing will be performed by employees of the Department of Agriculture or contracted personnel under the direction or supervision of Government personnel. The results of Government testing shall be issued on an official Federal Grain Inspection Service (FGIS) Commodity Inspection Certificate. A FGIS Commodity Inspection Certificate is required for invoice payment pursuant to the Invoicing Requirements clause of the contract.
2. Contractors shall provide advance notification to the appropriate FGIS field office of the scheduled production for all lots provided under the contract. The advance notification shall be sent between two and seven workdays, inclusive, prior to the start of production.
3. The Government will determine the average net weight of the filled containers in each production lot and the net weight of the total lot in accordance with established FGIS procedures for packaged commodities.
4. The Government will verify that the packaged commodity meets the U.S. Standards for the Condition of Food Containers.
5. Any re-test or appeal requested by a contractor shall be at the contractor's expense. The Contractor shall submit requests for re-test or appeal in writing to both the Contracting Officer's Technical Representative and the Contracting Officer listed on the contract award notification by e-mail or otherwise in writing.
